

ADD TO ENGINE OIL

ONE
SHOT

ENGINE OIL STOP LEAK

- STOPS & PREVENTS LEAKS
- REDUCES OIL LOSS AND BURNING

ABOUT THE PRODUCT: Wynn's Engine Oil Stop Leak helps stop and prevent engine oil leaks. With its one shot easy-to-use treatment and backed by European technology, Wynn's Engine Oil Stop Leak helps revive hardened or shrunken rubber seals, gaskets & O-rings to prevent further leaking until seals can be replaced.

ADVANTAGES: Wynn's Engine Oil Stop Leak softens and conditions oil gaskets and rubber seals, causing them to swell again to prevent further leaking. It also increases the temperature viscosity index to reduce oil loss and burning.

BENEFITS: Wynn's Engine Oil Stop Leak has been designed to provide the following benefits:

- Helps stop & prevents leaks
- Reduces oil loss and burning
- Restores hardened or shrunken rubber seals, gaskets & O-rings
- Easy-to-use one-shot treatment
- Safe for Catalytic Converters, DPF & other emission controls
- For all mineral & synthetic oils
- Treats up to 6 Litres of oil

APPLICATIONS: Wynn's Engine Oil Stop Leak is recommended for all Petrol, Diesel, Hybrid & LPG engines and is compatible with all mineral & synthetic oils. Note: Wynn's Engine Oil Stop Leak is a temporary solution until the seals can be replaced.

DIRECTIONS FOR USE:

1. Bring engine to operating temperature and switch off
2. Add entire contents of Wynn's Engine Oil Stop Leak to engine oil
